

5 Series Revolution & Direct Drive Counters

FEATURES:

- High quality
- Highly visible 5 digits
- Long mechanical life
- High speed
- Resettable

DESCRIPTION:

The LB-5 is quality high speed revolution counter. It increments 1 count per revolution, is bi-directional and resets with the rotation of the reset knob.

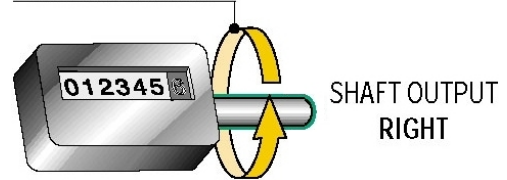

The RL-5 is a highly actuate direct drive counter. It increments 10 counts per revolution, is bi-directional and resets with the rotation of the reset knob.

The 5 series outstanding quality and features make it well suited for OEM equipment. Typical applications include tool machines, winding machines, automatic machines, presses, shearing machines, printing machines, measuring of tape, rope, extruded material, etc...

SPECIFICATIONS:

Model	LB-5	RL-5
Function	Revolution 1:1, 1 count per revolution, bi-directional	Direct drive 10:1, 10 counts per revolution bi-directional
Digits	5 digits	
Figure Size	4.4 x 2.8mm (.173 x .110")	
Shaft Diameter	4 mm (.157")	
Shaft Position	Right side	
Direction	Top going	
Reset	Button: one touch reset button. Do not reset while in motion	
Max. Speed	600 rpm	100 rpm
Housing	Metal base and cover; Plastic lens and reset button	
Weight	3 oz	

TOP GOING

SHAFT OUTPUT
RIGHT

DIMENSIONS: mm(inches)
